

Akino Inu

Akino Inu \$AKINO is an innovative deflationary token aiming to revolutionize Defi.

Akino Inu hyper-token whose aim multiple asset NFTs, nodes, staking & stablecoins. projects, this diversity allows risk while taking the possible non-growth of the assets.

Introduction Akino Inu

\$AKINO is a deflationary is to invest in classes such as altcoins, farming of Unlike FaaS investment to mitigate the advantage of correlated trending

Akino Inu \$AKINO is intended to be a hyper-deflationary token, profits made on treasury investments are then used to Charity (Community Vote), buyback & burn Akino Inu \$AKINO tokens. In addition to this deflationary mechanism, Akino Inu \$AKINO has implemented an automatic 1% burn. The merger of these two mechanisms guarantees a continuous rising price floor due to the decrease of the circulating supply.

Visio and Mission

Our Vision

- Akino Inu \$AKINO presents a simple way for DeFi users to benefit from investments in NFTs, Metaverse Land, and Defi. By handling the timeconsuming and often challenging work related to bridging, farming, and investing, Akino Inu \$AKINO returns yields (many of which are only available in other Layer 1 chains like Fantom, Arbitrum, Polygon, and Avalanche) to its users on the Binance Smart Chain network. By holding Akino Inu \$AKINO the user earns a share of profits.
- As a simple tokenomics you buy Akino Inu \$AKINO, our experts use it to invest in DeFi, NFTs, and Metaverse Land. We return the profits effortlessly back to you

Our Mission

At Akino Inu \$AKINO we are not just meme tokens, our mission is focused on two primary objectives:

- First and foremost, Akino Inu \$AKINO strives to create an opportunity for its users to benefit from metaverse centric investments. These include, but are not limited to, Metaverse land, NFT's, projects, and farms.
- Second, and equally important, is our emphasis on creating a fully integrated ecosystem of decentralized financial services built on interoperable technologies and controlled by its users collectively. Its governance mechanism is based upon our Akino Inu \$AKINO token, which will allow holders to participate in decisions affecting the parameters of the system
